summary

Senior QA Automation Engineer with 5+ years of expertise across fintech and e-commerce. I specialize in building test automation infrastructure from the ground up and scaling QA practices across high-stakes environments, including algorithmic trading and banking platforms. I have a proven track record of reducing bug escape rates by 30-35% and manual regression effort by up to 40% through strategic CI/CD integration, API and UI automation, and rigorous framework architecture. I'm proficient across REST, gRPC, GraphQL, WebSocket, and SFTP protocols. I regularly lead framework refactoring and optimization initiatives while mentoring engineers and shaping QA processes team-wide.

experience

Sense | Senior AQA Engineer

Apr 2025 - Jun 2026

- Maintained and executed ongoing regression testing across backend, UI, and mobile platforms
- Conducted regular code reviews, ensuring adherence to clean code standards and best practices
- Refactored legacy test code and updated outdated dependencies, improving framework stability and maintainability
- Built automated test suites for algorithmic trading, achieving ~90% coverage
- Monitored 3+ exchange and gateway integrations, maintaining 99.9% uptime during trading sessions
- Structured team knowledge repository, improving new engineer onboarding experience
- Reviewed and approved test deployment code, enforcing quality standards across backend, web, and mobile
- Continuously selected high-value test cases for automation, ensuring maximum coverage and regression confidence
- Designed LLM output validation tests covering schema correctness and hallucination detection

Bakai Bank | Lead/Senior AQA Engineer

Oct 2024 - Apr 2025

- Built automation framework from scratch across 3+ projects, scaling coverage from 0 to 70%+ automated regression
- Implemented CI/CD pipelines with test reporting, cutting commit-to-result feedback time by ~50%
- Led and mentored 4 QA engineers, improving sprint delivery consistency by ~25%
- Identified high-risk untested scenarios per feature through requirements analysis and risk assessment
- Reduced post-release critical bugs by ~35% through structured test planning and strategy
- Tested LLM tool-calling accuracy across 20+ scenarios, validating API selection and fallback behavior

Noveo Group | Middle+ AQA Engineer

Dec 2023 - Oct 2024

Oct 2021 - Aug 2023

- Built scalable automation frameworks across 4+ projects, cutting new project setup time by ~60%
- Automated 300+ API endpoints, reducing regression cycle from ~4 hours to under 2 hours
- Reduced UI test flakiness significantly improving CI pipeline reliability
- Mentored 2-3 junior engineers and successfully onboarded them to active teams
- Maintained full test-to-requirement traceability across all active sprints

Tinkoff Bank | AQA Engineer Middle+

Aug 2023 - Nov 2023

- Executed backend testing focused on data integrity, catching critical defects before production release
- Optimized existing test frameworks, improving overall execution speed and CI reliability
- Expanded API automation coverage by 15% within first 2 months of joining
- Standardized test documentation templates, reducing per-feature documentation effort across the team

skills

- **Languages:** Kotlin · Java · Golang · JavaScript/TypeScript
- **Backend & API Testing:** REST API · GraphQL · gRPC · Kafka · WebSocket · Postman · PostgreSQL
- **UI & Mobile Testing:** Selenium · Appium · Playwright · Cypress · Espresso · XCUITest
- **Performance Testing:** Gatling · JMeter
- **CI/CD & DevOps:** GitLab CI/CD · Jenkins · Docker
- **Frameworks & Libraries:** JUnit · TestNG · Cucumber · Spring · Maven · Gradle
- **Reporting & Test Management:** Allure TestOps · Jira · Confluence

education

New Zealand Diploma In Information Technology And Systems Administration

Aspire2International

Nov 2017 - Jun 2019
